

## Team No. Checkfront - Checkfront Wordpress Plugin Project

Sponsor: Checkfront

Members: Ben Allison, Josh Fraser, Kevin Jackson

Checkfront provides third-party booking and reservation services for hotels, events, tours, and more. The goal of the Checkfront Wordpress Plugin Project is to provide an out-of-the-box solution for Checkfront clients looking to integrate these services into their WordPress websites. The plugin provides wider customization options to Checkfront's clients while delivering all the core functionality of the Checkfront reservation system.

### The Team

#### **Kevin Jackson**

Kevin Jackson is a software developer with production experience in a dizzying array of technologies and domains. He currently works as a full-stack developer at Checkfront, helping the world get booked online; Kevin employs a comprehensive approach to developing top-quality, performant software that aligns the needs of businesses and their users.

#### **Ben Allison**

Ben Allison has an aptitude for problem solving and troubleshooting, and enjoys building maintainable frameworks that integrate seamlessly with existing technologies. Professionally, Ben has designed and implemented a web based product management system for local businesses, worked as an online contractor maintaining the backend for one of the world's largest Bitcoin mining pools, and recently joined Checkfront as a Junior Software Developer.

#### **Josh Fraser**

Josh Fraser has provided support and development for a number of high-visibility government websites as a Co-op Web Developer at CGI Victoria. He has gained experience in HTML/CSS, JavaScript, Content Management Systems, Linux-based operating systems, and a variety of other technologies.

*Team No. Checkfront* would like to thank its sponsors at Checkfront, Brandon Ellis and Jason Morehouse, as well as the Camosun College CST faculty, and department chair Saryta Schaerer for their support in this project.
